

## Our Promise to You

With professional experience in the medical industry, our founders know the importance of hassle-free, dependable environmental services. By following up-to-date regulations and specialized protocol, employing carefully selected environmental service technicians, and customizing our plans to meet your needs we guarantee excellent service and the highest standard of safety and hygiene.

All of our services follow CDC and AORN standards and our streamlined plans allow us the time to provide them effectively and efficiently.

### Our process includes, but is not limited to:

- Exercising hand hygiene and using PPE appropriately
- Cleaning and then disinfecting high to low, left to right, clean to dirty
- Using one of three approved terminal/end-of-day cleaning methods, the perimeter cleaning method
- Never double-dipping cloths or mops
- Maintaining contact time per instructions on disinfectant labels
- Focusing on often overlooked areas such as cleaning vents, glass, or marks on the floor.
- Spot cleaning walls and ceilings daily

### We also provide:

- Schedule to mechanically clean floors and to clean walls and ceilings
- Background checks, training documentation, and shot documentation for all employees
- Daily service check-lists with employee verification

Our team is trained to meet the above standards and to specifically follow the customized check-list for your facility upon hire. Additionally, they are trained 4 hours per month for a total of 20 hours of training to be eligible to certify as a Surgical Cleaning Technician.

Accentus Solutions has been officially trained by the Association for the Health Care Environment (AHE) and is authorized by the American Hospital Association (AHA) to provide certification training to employees desiring to be certified as Surgical Cleaning Technicians.

As the only authorized T-CSCT in Central Indiana, we're setting a goal for our team to become Certified Surgical Cleaning Technicians and provide the highest quality of care following the most updated regulations.
